How to choose your suitable positioning system?

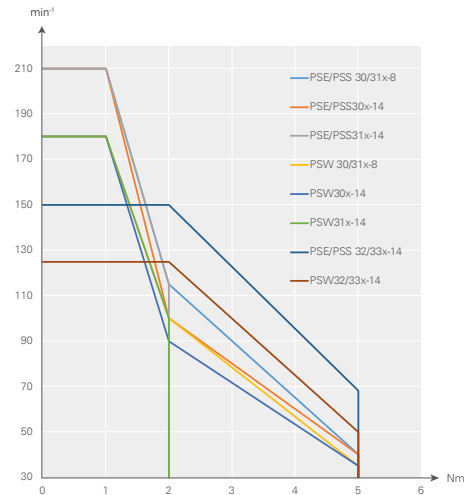

Torques and speeds

To order our standard products, you can use the graphics on the right for an initial performance assessment of the products and the corresponding order code of the 3 series. The ordering process is described below using an example.

A Choose the appropriate **design** based on your operating conditions

B **Type:**
- Vertical or horizontal form (value even or odd)
- max. rated torque (x) - for orientation see characteristic diagrams
- Output shaft (8 or 14) and solid or hollow shaft

C select required protocol / interface (**bus communication**)

D integrate the **connections** that are essential for you

E if necessary, select a **brake** (without brake select 0)

F select required **certificates**

G select **IP protection class**

For example, a stainless steel housing (PSS), the 30x design, a maximum rated torque of 2 Nm and an 8 hollow shaft would be required (302-8). Besides IO-Link, the standard connections are required, no brake, the CE/UKCA certificate and IP65.
